2007 Created

推奨用紙 35cm

大学生だった当時、「おりがみ新世代」という画像掲示板を複数設置した交流型のウェブサイトを作り、運営していました。その中に、毎月お題を出して競作をするという場があり、そのお題が「猫」だった際に作った作品です。創作においてモチーフ選びというのは意外と難しいのですが、何らかの形でその機会が得られるとスムーズに進む場合があります。

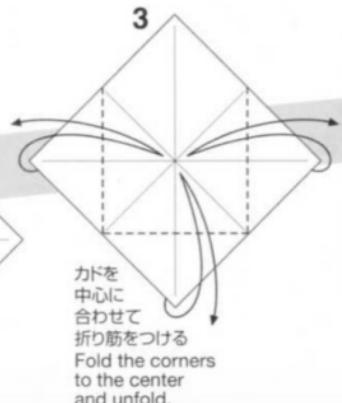

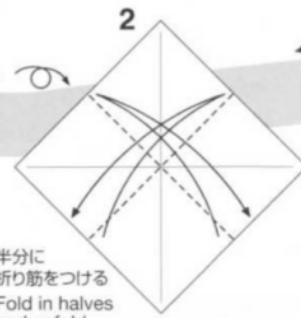

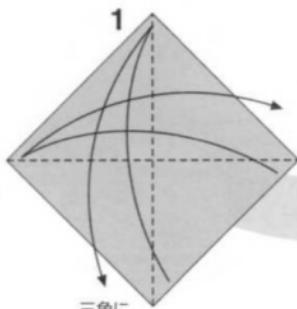

デザインについてときどき質問をされますのが、この作品は最初から長毛の猫を折ること、そしてインサイドアウトをする目標としていました。また、特徴的な顔のデザインについては、資料としていた猫の画像を観察していたところ、鼻から目、そして耳にかけての「ライン」があることに気付き、試行錯誤を繰り返した結果、最終的には耳から出たカドを鼻の模様の下に差し込むことでそれを実現しています。こういったラインは中々意識して見つけられるものではありませんが、それを見つけた瞬間は折り紙創作において最も興奮できる瞬間の一つであるように思います。

また、この顔は90度のカドさえあれば折ることができるため、他の動物の頭に組み込んだり、複数の頭を折り出したりという、折り紙ならではの「遊び」が可能な便利なバージョンもあります。面白い例がでたら、是非教えて下さい。

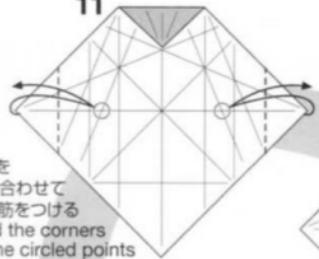

When I was in college, I was running a web site "Origami New Generations". The site used to plan thematic contests every month, and I designed this cat model when the monthly theme was cat. Though selection of motif to fold is usually hard, being given a set goal sometimes makes things go smoothly.

People often ask questions about inspirations and ideas behind my design of models, and, as for this cat, I had a goal of having in the end a long-haired cat using color change. I observed pictures of cats and found the "line" in cats from the nose to ears going through eyes. I established the "line" by putting the corner coming from the ears under the patterns of the nose. A new discovery of this kind is one of the most exciting moments when we design origami models.

The face of this model is based on 90 degree flaps, so it can easily be incorporated as the head of other animal models (or it may even be possible to fold out more than one head). Tell me if you come up with some interesting applications.
